The perfect solution for beautiful nails...

If you haven't yet discovered the latest must-have nail care product, you don't know what you are missing out on!

Unlike varnish that chips and peels, Bio Sculpture is a durable Gel that is applied as an overlay onto natural nails by a qualified nail technician. The Gel is then cured under UV light to give it that strong, flexible, glossy finish which lasts for three weeks. It soaks off easily without damage to nails.

No damage to natural nails

Unlike other nail finishes, Bio Sculpture Gel is a nail treatment applied as a coating to your own nails to strengthen and condition them with no damage.

Applies quick & easy

With no fumes, no odours and minimal buffing, you will enjoy seeing your nails transformed to their exceptional potential.

Dries instantly

Applied onto the natural nail, over tips or a sculptured extension, Bio Sculpture Gel dries instantly under a UVA curing lamp in your choice of colour or natural finish. Bio Sculpture Gel is compatible and can be applied over other nail systems.

Durable, flexible & no more chipping

Long-wearing and chip-proof, your Bio Sculpture Gel treated nails keep their well manicured look long after application. Excellent on toe nails, with no worn or ragged edges.

Functional & fashionable

Choose from over 130 Permanent Colours, Clear or French.

Matching colour nail polishes allow flexibility of Permanent Colour Gels, simply apply one of our different nail polishes over the Permanent Colour Gel. This can be removed easily with our specially formulated 'Non Acetone Nail Polish Remover' and you are back to your Permanent Colour Gel

Your Guarantee

You are always assured of a quality, professional nail service with Bio Sculpture treatments. Bio Sculpture Nail Technicians are all qualified as graduates of our extensive training courses and workshops

Clinically tested

Bio Sculpture Gel has been clinically tested to the highest standard with excellent results, taking care of you, our valued client.
